9. USB TYPE-C PORT

WELCOME TO THE BLU View 5

With so many advanced features, this phone is the perfect choice for your personal and business communication needs. In this booklet, we'd like to share an introduction to some of those features.

Get more information about these features online:

Go to your service provider's website > Help >

*Tutorials and User Manuals > Enter **B160V** in the Search bar >*

Click phone image > About Phone

ESSENTIAL INFORMATION

Your phone has several unique identifier numbers that you may need for activation and other functions. You can access these numbers as follows:

Unique Numbers

► Home > Swipe up > Settings > About device

Your Serial Number will appear when you tap **IMEI**.

Your Phone Number will appear when you tap **Phone number**.

SIM Number

Your SIM number begins with **89**. You can find it on the red Activation Card that came with your phone or, on the SIM card.

CLOUD STORAGE

Google One

► Settings > System > Backup > Backup by Google One

Google One is a cloud storage solution that allows you to free up memory space on your device and still have full access to your most important information, allowing you to collaborate on documents and to share files, photos and more. You will need to create a Gmail account during the setup process of your phone or at google.com/gmail to access some cloud services, Google services, and several phone features.

When you use the Cloud, you will not have to worry about losing your data to a lost, stolen, or a broken device. You will get an easy and seamless backup, sync, restore, and upgrade experience across all your Android devices. The files you store on Google One are private by default and are encrypted using your account password. Account and privacy settings can be changed as necessary.

ACCESSIBILITY

► Settings > Accessibility

Accessibility services are special features and enhancements that make using your device easier. The services available in Accessibility allow you to customize the device to improve the experience of people with physical, sensory, or cognitive disabilities. You can turn Accessibility features ON/OFF as needed.

Accessibility features include enhancements for:

- Downloaded apps
- Captions
- Display
- Audio
- Interaction controls
- General

ANDROID AUTO

► Settings > Connected devices > Connection preferences > Android Auto

Android Auto integrates your phone into your car's entertainment system. If your car is compatible, and has a display or a touchscreen, Android Auto can mirror the phone's screen on the car's display screen, and you will be able to access your phone using voice commands or the car's touchscreen or buttons. This will help minimize the need to reach for your phone while you drive.

CAMERA

► Home Screen > Camera

Main Rear Camera: 13MP + 2MP Macro / Front: 8MP

Video recording resolution: 1080P@30fps

Pictures and videos taken with the camera are saved to the Photos folder by default. You can also back up pictures and videos to the Cloud or to a compatible microSD card of up to **256GB** if you have one installed. These options will help you save memory space on your device.

Special features

- Professional
- Motion photo
- Geo tagging
- Super macro
- Touch shot
- Google lens
- Time lapse
- Self-timer
- Torch

Screenshots

When you capture a screenshot, a Screenshots album will automatically be created in Photos where all screenshots will be saved. You can capture an image of your screen several ways:

- Press the Power key and the volume DOWN key quickly at the same time.
- Tap the recently-used applications icon and tap Screenshot.

DATA USAGE

► Settings > Network & internet > Mobile network

Your smartphone Service Plan includes data. There are several options to monitor how your data is being used, and to set limits to conserve it. If you log in to Wi-Fi networks, you should connect to secure networks and set up passwords as necessary. The Mobile network menu will allow you to:

- Turn Mobile Data ON/OFF
- Turn Data Saver ON/OFF
- Set or remove limits to mobile data usage
- Monitor mobile data usage for your apps

DIGITAL WELLBEING AND PARENTAL CONTROLS

► Settings > Digital Wellbeing & parental controls

You can monitor and manage your digital habits by getting a daily summary on the Dashboard. This tool will automatically pause apps after your selected daily limit is reached. You can also disconnect from your screen using Bedtime mode and Focus mode.

Set Parental controls to supervise your children's digital life with Google's Family Link app available in the Play Store. You will be able to add restrictions to Google services, set app approvals, content filters, and set screen time limits for each user.

GBOARD

► Settings > System > Keyboard > On-screen keyboard > Gboard

This Google virtual keyboard app features Glide Typing, voice typing, and handwriting. Gboard includes a predictive typing engine that recognizes context. A Google account is not required.

GESTURES

► Settings > System > Gestures

Gestures let you customize the way you interact with your device. You will need to allow access to your contacts, location, camera, and other services. Gesture options include:

- Quickly open camera
- Press and hold power button
- Navigation mode
- Prevent ringing

MULTIPLE USERS

► Settings > System > Multiple users

Share this device by adding users. Each user has their own profile and they can customize the phone to fit their needs while they are logged in to their profile. Any user can update apps and adjust settings like Wi-Fi that are used by everyone. Updates and settings for shared functions will be applied to all user profiles.

QUICK SHARE

- Settings > Connected devices > Connection preferences > Quick Share

This platform uses the method that the two devices recognize as fastest to let you share content across compatible devices, even if they are from different manufacturers. Adjust visibility settings to limit the files you receive.

SAFETY & EMERGENCY

- Settings > Safety and emergency

Medical Information: Store your medical information on your device so that medical personnel can access it from your lock screen without requiring your password or an internet connection.

Emergency SOS: In an emergency, quickly make a call or send an SMS text with your location to a designated contact. You can record and save a video of up to 45 minutes. Once this feature is activated, and you designate a contact, press the Power button 5 times to send the SOS message. Default mode is OFF.

Emergency Location Services (ELS): This Google tool allows first responders to identify the location of an emergency call/text from an Android device faster and more accurately, even if the device's Location setting is set to OFF. Your phone must be running Android 10 or later. Locations are sent directly to the emergency service contacted and are not viewed by Google.

SECURITY & PRIVACY

- Settings > Security & privacy

Google Play Protect: Run a safety check on Play Store apps before downloading. Using Google Play Protect, App Security will regularly check app updates and your device for security risks. You will receive a notification if any threats are detected. Default setting is ON.

Screen Lock: Secure your device using a Screen lock to help prevent unauthorized access to your device. Screen locks have various levels of security and include a swipe, a pattern, a numeric PIN, and a password.

Find My Device

- Settings > Security & privacy > Device finders > Find My Device

Perform various functions remotely so you can locate a lost device and also protect your data. You must have a Google (Gmail) account and turn Google location service ON to use this feature. Default mode is ON.

Permission manager

- Settings > Privacy > Permission manager

Some apps, like the camera, microphone, or location services, access features of your device when they are running in the background. You can set your device to notify you when access is requested.

More Security & Privacy

- Settings > Privacy > More security & privacy

SIM Lock: Information on your SIM card can be compromised if the SIM card is placed into another device. To help protect it, you can create a PIN that will lock access to the SIM card.

App Pinning: Pin an app to the screen and block usage of all other functions of the phone. This feature is very helpful if you want to lend your phone to another user, such as a child, so that they can only use the pinned app.

Wi-Fi

- Settings > Network & internet > Internet > Wi-Fi ON/OFF

Wi-Fi is a wireless network technology that provides high-speed internet and network connections without using the data allocated to your service plan. Connecting to a public Wi-Fi network can leave your personal data vulnerable, so it is important that you connect to secure networks and set up passwords.

Wi-Fi Direct

- Settings > Network & internet > Internet > Network preferences > Wi-Fi direct

Share data between Android devices even if they are from different manufacturers. You will not need to be connected to a Wi-Fi network.

Share

- Settings > Network & internet > Internet > Select connected Wi-Fi > SHARE icon

Generate a QR code that gives anyone who needs temporary access to your Wi-Fi an easy way to connect by scanning the QR code with their phone's camera. Devices must be running on Android 10 or newer and must support the Easy Connect Wi-Fi. Not all devices will be compatible.

HEALTH & SAFETY INFORMATION

Before You Start: **WARNING!** Cancer and Reproductive Harm
www.P65Warnings.ca.gov

Battery Safety and Precautions

Use only BLU authorized batteries and accessories

Warning: Do not throw away batteries with uncontrolled daily waste.

Safety precautions for power supply unit

A product should be operated only from the type of power source indicated on the electrical ratings label. If you are not sure of the type of power source required, consult your authorized service provider or local power company. For a product that operates from battery power or other sources, refer to the operating instructions that are included with the product.

Hearing Aid Compatibility (HAC) for Wireless Telecommunication Devices

The Federal Communications Commission has implemented rules and a rating system designed to enable people who wear hearing aids to use these wireless telecommunications devices more effectively. The standard for compatibility of digital wireless phones with hearing aids is set forth in American National Standard Institute (ANSI) standard C63.19. There are two sets of ANSI standards with ratings from one to four (four being the best rating): an "M" rating for reduced interference making it easier to hear conversations on the phone when using the hearing aid microphone, and a "T" rating that enables the phone to be used with hearing aids operating in the tele-coil mode thus reducing unwanted background noise.

FCC Regulations

This mobile phone complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information (SAR)

This mobile phone meets the government's requirements for exposure to radio waves.

This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

FCC ID#	YHLBLUB160V
HAC rating	HAC-2019
SAR Head	1.29 W/kg
SAR Body	0.89 W/kg
