

Introducing Gemini

Supercharge your creativity and productivity, with help from Google AI.

The Gemini ecosystem

The **Gemini** ecosystem represents the most capable AI from Google with a family of Large Language Models (LLMs), multimodal support, and integration into Google products like **Gmail** and **Google Workspace**.

Meet the Gemini model family

In the cloud

Gemini Ultra

Google's most capable AI model for complex tasks and reasoning, available to customers with a **Google One AI Premium** plan.

Gemini Pro

A model for scaling across a wide range of tasks, accessed using the **Gemini** app or in a browser at gemini.google.com.

On-device

Gemini Nano

An efficient model built for **on-device** tasks, helping with things like **Magic Compose**. Available on devices such as Pixel 8 Pro and Samsung Galaxy S24 series.

Gemini Web App

Gemini helps you learn, create, and solve problems. Integrating into Google services like **Gmail**, **Google Maps**, and **YouTube**, **Gemini** can bring more context to provide helpful answers.

Visit gemini.google.com to get started.

Gemini Mobile App

Unique to Android, the new **Gemini** app can be downloaded from **Google Play**.¹

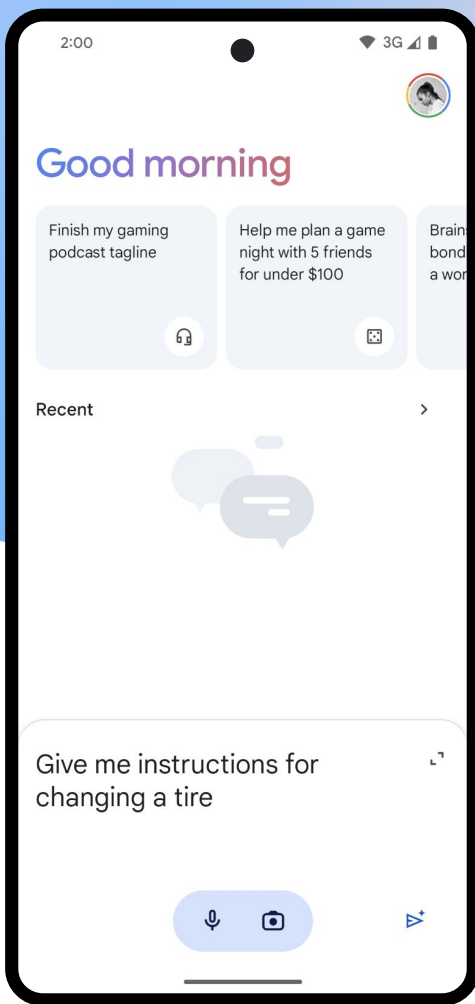

Enjoy enhanced Google app integration for help with events, scheduling, and more.

Opt-in to use **Gemini** instead of **Google Assistant**

¹ Gemini app is available in 150 countries, with more coming soon.

Get started with Gemini

Type a question

Tap on a suggested query above or try typing

“Give me instructions for changing a tire.”

Ask for help

Tap the microphone and speak

“Help me create a plan for a dinner party for 8 friends.”

Visual search

Tap the camera to upload a picture and ask questions

“Who is the architect?”

Share your findings

Tap to share to **Google Docs** or create an email with **Gmail**.

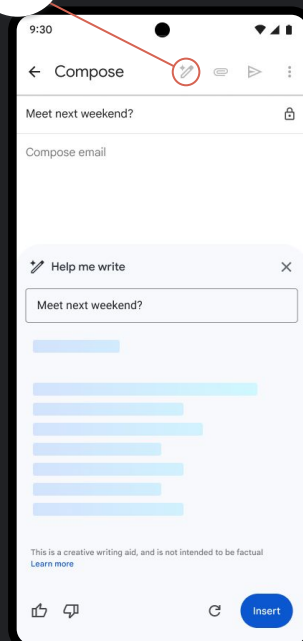

Supercharge your emails with Gemini in Gmail

Access **Gemini in Gmail** with a **Google One AI Premium plan**.*

Gemini helps you write and refine emails or respond to them on the go.

Create emails from a simple prompt, then tap  to adjust the tone or style, e.g. **Formalize** or **Elaborate**.

AI Premium

Tap **Compose** to start a new email and in the text area, tap **Help me write**.

Type in a prompt like **“Write a note to school asking for details of the science club.”** and tap **Create**.

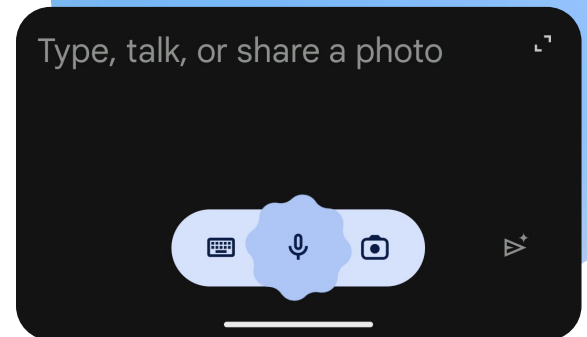

Tap **Insert** to accept the new draft.

Tap on the pencil icon again to change the tone of the draft.

*Visit one.google.com for pricing and availability.

Customer conversations

Use these tips to respond to customer questions and concerns.

Why should I be interested in Gemini?

Gemini is Google's next generation AI, offering a more natural way to get information so you can learn, create, and be more productive.

Gemini can compose creative text in different tones, help generate ideas, plan events and much more. It's integrated into Android, bringing a more contextual and helpful assistant.

What do I need to use the Gemini app?

- Sign into your Google Account
- **Gemini** in a browser is available in most regions and understands more than 40 languages
- **Gemini** app works on devices with 4 GB RAM, running Android 12+, such as
 - Google Pixel 6 and above
 - Samsung Galaxy A52 / S22 and above
- **Gemini** app is currently available in English, Japanese, and Korean in more than 150 countries.

What about Google Assistant?

- Unique on Android, **Gemini** can act as your assistant, making it easier to access and get help
- **Gemini** has many **Google Assistant** voice features like setting timers, making calls, and more
- More features will be supported in the future
- You can switch back your digital assistant in **Settings**

How can I use Gemini like Google Assistant?

- When you download the **Gemini** app, you can opt-in to replace **Google Assistant**
- Once you opt in, access **Gemini** by saying "**Hey Google**" or long press the **power button**.*
- When activated, you can say "**Hey Google**" to pop Gemini over your screen at any time

What happens to my data?

With Google, you are always in control of your data. You can review your prompts, delete your **Gemini** activity, and turn off **Gemini** activity in **My Activity** at any time.
