STARTING!

After you enter into the systems, at the bottom of the screen, you'll find three Navigation buttons. They're always available. No matter what you're doing with your LINSAY Tablet PC, you can always get back to the main home screen or return to previous screens:

Icon Name Description

Back	Open the previous screen you were			
	working in, even if it was in a different			
	app. Once you back up to the Home			
	screen, you can't go back any further in			
	your history.			
•				

Home	Open Home. If you're viewing a left or		
	right home screen, opens the central		
	home screen.		

Recent Apps Opens a list of thumbnail images of apps you've worked with recently. Top open

After a short time without getting used, these buttons may shrink to dots or fade away, depending on the current app. To bring them back, touch their location.

The All Apps icons are scrolling from down to up.

The middle of your Home screen can hold app and widget icons, plus folders.

- To open an app, folders, or widget, touch its icon.
- To see additional Home screens, swipe your finger quickly left
 or right.

System icons on the right up display slide down to show the current wireless and network connection strength, battery level, time, and more.

Touch & type

Use your fingers to manipulate icons, buttons, menus, the onscreen keyboard, and other items on the touch screen. You can also change the screen's orientation.

To select or activate something, touch it:

www.LINSAYdigital.com

To type something, such as a name, password, or search term, just touch where you want to type. A keyboard pops up that lets you type into the field.

Other common gestures include:

- Touch & swipe: Touch & swipe an item on the screen by touching it and not lifting your finger until an action occurs.
- Drag: Touch & hold an item for a moment and then, without lifting your finger, move your finger on the screen until you reach the target position. For example, you can drag to reposition shortcuts on the Home screen.
- Swipe or slide: Quickly move your finger across the surface of the screen, without pausing when you first touch (so you don't drag something instead). For example, you can slide a Home screen left or right to view the other Home screens.
- Pinch: In some apps (such as Maps, Browser, and Gallery), you can zoom in and out by placing two fingers on the screen at once and pinching them together (to zoom out) or spreading them apart (to zoom in).
- Rotate the screen: On most screens, the orientation of the screen rotates with your device as you turn it. You can change this on Display settings.

Connect to Wi-Fi networks

Wi-Fi is a wireless networking technology that can provide Internet access at distances of up to 80 meters, depending on the Wi-Fi router and your surroundings.

To use Wi-Fi, you connect to a wireless access point, or "hotspot." Some hotspots are open and you can simply connect to them. Others implement security features that require other steps to set up, such as passwords or pass codes to ensure that only authorized users can connect. To extend the life of your battery between charges, turn off Wi-Fi when you're not using it. You can also set your device to disconnect automatically from Wi-Fi networks when it's sleeping.

Turn Wi-Fi on and connect to a Wi-Fi network

If you're adding a Wi-Fi network when first setting up your device, Wi-Fi is turned on automatically.

1 Touch the Settings icon \blacksquare on a Home or All Apps screen.

2 Touch Wireless & networks > Wi-Fi.

3 Slide the Wi-Fi switch to the **On** position.

The device scans for available Wi-Fi networks and displays the names of those it finds. Secured networks are indicated with a Lock icon. If the device finds a network that you connected to previously, it connects to it.

4 Touch a network name to see more details or connect to it.

If the network is secured, you're prompted to enter a password (double check to confirm you are placing the correct one) put "show password" to verify it.

To modify a network's settings, touch & hold the network name.

IMPORTANT: AIRPLANE MODE MUST TO BE OFF IN ORDER TO GET WI-FI CONNECTION. IF YOU ARE HAVING TROUBLE CONNECTING YOUR WIFI PLEASE CHECK THE AIRPLANE MODE IS OFF AND IF THE PASSWORD IS CORRECTLY PLACED.

ALSO; DISCONNECT YOUR ROUTER, WAIT A FEW MINUTES AND CONNECT IT AGAIN.

Add a Wi-Fi network

You can add a Wi-Fi network so your device will remember it, along with any security credentials, and connect to it automatically when it's in range. You must also add a Wi-Fi network if the network does not broadcast its name (SSID), or to add a Wi-Fi network when you are out of range.

To join a secured network, you first need to learn security details from the network's administrator.

- 1 Turn on Wi-Fi, if it's not already on.
- 2 In the Wi-Fi settings screen, touch Add Network.

3 Enter the SSID (name) of the network. If necessary, enter security or other network configuration details.

4 Touch Save.

The information about the network is saved. Your device will connect to this network automatically the next time you come within range.

Forget a Wi-Fi network

You can make the device forget about the details of a Wi-Fi network that you added; for example, if you don't want the tablet to connect to it automatically or if it's a network that you no longer use.

1 Turn on Wi-Fi, if it's not already on.

2 In the Wi-Fi settings screen, touch the name of the network.

3 Touch Forget in the dialog that opens.

Configure proxy settings for a Wi-Fi network

Some network administrators require you to connect to internal or external network resources via a proxy server. By default, the Wi-Fi networks you add are not configured to connect via a proxy, but you can change that for each Wi-Fi network you've added.

Proxy settings are used by Browser but may not be used by other apps.

1 Touch & hold a network in the list of Wi-Fi networks you've added.

2 Touch **Modify network** in the dialog that opens.

3 Select Show advanced options.

4 If the network has no proxy settings, touch **None** under Proxy Settings, then touch **Manual** in the menu that opens.

5 Enter the proxy settings supplied by your network administrator.

6 Touch Save.

The proxy settings apply only to the Wi-Fi network you modified. To change the proxy settings for other Wi-Fi networks, modify them individually.

Set Wi-Fi notifications, disconnect policy, and other advanced options

To work with advanced Wi-Fi settings:

1 Turn on Wi-Fi, if it's not already on.

2 In the Wi-Fi settings screen, touch the Menu icon and choose **Advanced**.

These are the settings you can adjust:

• Network notification: By default, when Wi-Fi is on, you receive notifications in the Status bar when your device detects an open Wi-Fi network. Uncheck this option to turn off notifications

• Avoid poor connections: Check to automatically avoid using networks with a low-quality or intermittent Internet connection.

• Keep Wi-Fi during sleep: To conserve mobile data usage, your device stays connected to Wi-Fi when the screen goes to sleep.

Touch this option to change this default behavior: either to stay connected to Wi-Fi only when the device is connected to a charger (when battery life isn't a problem), or never to stay connected to

Wi-Fi during sleep. The latter choice is likely to increase mobile data usage. You may want to revisit this setting if you receive a notification that you're approaching your specified mobile data limit.

• Wi-Fi frequency band: 2.4 GHz Band

This screen also displays the following information:

• MAC address: The Media Access Control (MAC) address of your device when connected to a Wi-Fi network.

• IP address: The Internet Protocol (IP) address assigned to the device by the Wi-Fi network you are connected to (unless you used the IP settings to assign it a static IP address).

Lock Screen

IMPORTANT: Nobody can unlock the tablet without the correct passcode. If you don't remember the code placed, the device will be permanently locked, Tablet must to be sent to @linsaytechnicalsupport to be erased completely and software replaced.

Arrange & work with Apps

To see all your apps, touch the All Apps icon on any Home screen.

The main All Apps screen opens. This is where you can see all your apps, including those downloaded from Android Market. You can move app icons to any of your Home screens.

From All Apps, you can

• Move between screens: Swipe to up.

- Launch an app: Touch its icon.
- Place an app icon on a Home screen: Touch & hold the app icon, slide your finger, and lift your finger to drop the icon in place.
- Place an app icon in the Favorites tray: Touch, hold, & slide to move one of the Favorites icons out of the tray. Then use the same technique to move another one into the same position.
- Get more apps. Touch the Play Store icon.

To remove an app icon from the Home screen, touch and hold it, slide your finger toward the top of the screen, and drop the app over the Remove icon

Note The All-Apps icon III in the Favorites tray is permanent. You can't move it.

Add widgets

Widgets are like windows into your apps. They're available from an All-Apps tab for you to move onto your

Home screens.

From the main Widgets screen, you can

- Move between screens: Swipe left or right.
- Drag a widget to a home screen: Touch and hold the widget's icon, slide your finger where you want to place it, and lift your finger.

You may be asked to make further choices before the widget activates. If there isn't room where you dropped it, the widget won't get added to the home screen.

All your People information is available from Gmail, Google Talk, Messenger, Tablet, and other apps where it's useful. As you add contacts from different sources, they are synced automatically across all the places you need them.

You can add you Gmail account to have access to Play Store

www.LINSAYdigital.com

To view your contacts, touch the People icon <a>Image: Second and Second an

The first time you launch People, you're asked to sign in or create an account. Then the app opens to the main list of your contacts. You can view them in three ways from the tabs at the top of the screen: Groups, All, and Favorites:

From any of the main views, you can

- Read details. Touch a name to see details for a contact or group.
- Edit details. While viewing a contact, touch the Menu icon and choose options to edit or share contact details, and so on. You can also touch the star beside the Menu icon to add a contact to your Favorites list.
- Change your settings. While viewing the main list screen, touch the Menu icon to import or export contacts, choose display options for the Groups and All tabs, and add or edit accounts.

Use your Camera

The Camera app is a combination camera and camcorder.

You can use it for Video Chats and Video required Apps; view photos and videos you take with Camera in the Play app

To take pictures and videos, first touch the Camera icon reason a Home or All Apps screen.

When Camera opens, you can

- Take a picture: Touch the blue button.
- View the most recently taken picture: Touch the thumbnail near the blue button.

Optimize battery life go to Settings – Battery – Battery Manager

You can extend your battery's life between charges by turning off features that you don't need. You can also monitor how apps and system resources consume battery power.

Extend the life of your battery

- If you aren't using Wi-Fi, or GPS, use the Settings app to turn them off. The GPS setting is located in Settings > Personal > Location services.
- Don't leave the Maps or Navigation apps open on the screen when you're not using them. They use GPS (and thus more power) only when they're running.
- Turn down screen brightness and set a shorter Sleep timeout:
 Settings > Device > Display.
- If you don't need it, turn off automatic syncing for all apps: Settings > Personal > Accounts & sync. Note that this means you need to sync manually to collect messages, email, and other recent information, and won't receive notifications when updates occur.
- If you know you won't be near a mobile or Wi-Fi network for a while, switch to Airplane mode:

Press and hold the power switch until the Tablet options dialog appears. Then touch **Airplane Mode**.

Check battery level and usage details

• Open Settings > Device > Battery.

The list at the bottom of the screen shows the breakdown of battery usage for individual apps and services. Touch a graph for more details. The details screen for some apps includes buttons that allow you to adjust settings affecting power usage, or stop the app completely.

Warning!

If you stop some apps or services, your device may not work correctly.

Battery status (charging, discharging) and level (as a percentage of fully charged) are displayed at the top of the screen.

The discharge graph shows battery level over time since you last charged the device, and how long you've been running on battery power.

Use the Apps screen

The Apps screen allows you to adjust several aspects of the way your device uses memory. To view these settings:

1 From a Home or All Apps screen, touch the Settings icon oxdots .

2 Under Device touch Apps.

You'll see three tabs at the top of the screen, each displaying a list of apps or their components:

• **Downloaded.** Displays apps you've downloaded from Google Play store.

 Running. Displays all apps, processes, and services that are currently running or that have cached processes, and how much RAM they are using.

The graph at the bottom of the Running tab shows the total RAM in use and the amount free. Below the graph, touch **Show cached processes** or **Show running services** to switch back and forth.

• All. Displays all apps that came with Android and all apps you downloaded from Android Market or other sources.

To switch the order of the lists displayed in the **Downloaded** or **All** tabs, touch Menu icon **Sort by name** or **Sort by size**.

To view details about an app or other item listed under any tab, touch its name. The information and controls available vary among different types of apps, but commonly include:

• Force stop button: Stops an app that is misbehaving. Stopping an app, process, or service may cause your device to stop working correctly. You may need to restart your device after doing this.

Uninstall button: Deletes the app and all of its data and settings.

• **Disable button**: Prevents the app from running, but does not uninstall it. This option is available for some apps and services that can't be uninstalled.

• Clear data button: Delete an app's settings and other data without removing the app itself.

• Clear cache: If the app stores data in a temporary area of the tablet's memory, lists how much information is stored, and includes a button for clearing it.

• Launch by default: If you have configured an app to launch certain file types by default, you can clear that setting here.

• **Permissions**: Lists the kinds of information about your tablet and data the app has access to.

Enter & edit text

Use the keyboard

You can enter text using the onscreen keyboard. Some apps open it automatically. In others, you open it by touching where you want to type.

www.LINSAYdigital.com

As you type, the keyboard displays suggestions above the top row of keys. To accept a suggestion, touch it.

Basic editing

 Move the insertion point: Touch where you want to type. The cursor blinks in the new position, and a green tab appears below it. Drag the tab to move the cursor.

• Select text: Touch & hold or double-tap within the text.

The nearest word highlights, with a tab at each end of the selection. Drag the tabs to change the selection.

The tab disappears after a few moments, to get out of your way. To make it reappear, touch the text again.

• **Delete text:** Touch to delete selected text or the characters before the cursor.

• Cut, copy, paste: Select the text you want to manipulate. Then touch the Paste 𝔅 , Cut 𝔅 , or Copy 🕞 button :

To make the keyboard go away, touch **Done**.

• Change input language or keyboard: Touch & hold the key to the left of the space bar (with ... In the lower-right corner), and then release it.

The Input options menu appears. Choose the option you want to adjust.

Connect to keyboards, mouse, and other devices

You can connect a keyboard, mouse, or even a joystick or other input device to your tablet via USB and use it just as you would with a PC.

You may need an adapter to connect the keyboard or other device to your tablet's USB port. To connect more than one USB device at a time, use a powered USB hub to reduce the drain on your tablet's battery.

Keyboards

In addition to entering text, you can use your keyboard to navigate your tablet's features:

- Use the arrow keys to select items on screen.
- Pressing Return when an item is selected is equivalent to touching that item.
- Pressing Escape is equivalent to touching Back.
- Press Tab or Shift-Tab to move from field to field in a form or other screen with multiple text fields.

Mouse

When you connect a mouse to your tablet and move the mouse, an arrow-shaped cursor appears, just as on a computer:

- Use the mouse to move the cursor.
- Clicking, pressing, and dragging with the mouse button is equivalent to touching, touching & holding, and dragging with your finger.
- Only one mouse button is supported.

Other input devices

You can other input devices to your LINSAY. However, games and other apps must be designed to support any special features of an input device, such as dedicated buttons or other controls, to take full advantage of them.

Connect to a Windows computer via USB

You can use a USB cable to connect your phone to a Windows computer and transfer music, pictures, and other files in both directions.

When you connect your tablet to the USB port on your computer, its USB storage is mounted as a drive and appears on your

computer screen. You can now copy files back and forth as you would using any other external device.

When you're finished, simply disconnect the tablet by unplugging the USB cable.

Settings > Device > Storage > Menu > USB computer connection

Manage accounts

Add or remove accounts

You can use multiple Google Accounts and Microsoft Exchange ActiveSync accounts on your device.

You may also be able to add other kinds of accounts, depending on your apps. Some you can add in the Accounts & Sync screen, as described here. Others you add using an app that works with those kinds of accounts. For example, you can add IMAP and POP3 email accounts with the Email app.

To view the Accounts & sync settings screen described here:

1 From a Home or All Apps screen, touch the Settings icon.

2 Under Personal, touch Accounts & sync.

Add an account

To add some accounts, you may need to obtain details from system administrator about the service to which the account connects. For example, you may need to know the account's domain or server address.

1 Go to Settings > Personal > Accounts & sync.

2 Touch Add account.

3 Touch the kind of account to add.

4 Follow the onscreen steps to enter information about the account.

Most accounts require a username and password, but the details depend on the kind of account and the configuration of the service you're connecting to.

Depending on the kind of account, you may be asked to configure what kinds of data you want to sync, name the account, and other details.

When you're finished, the account is added to the list in Accounts & sync. Depending how you configured the account, email, contacts, and other information start syncing to your device.

Remove an account

You can remove an account to delete it and all information associated with it from your device, including

E-mail, contacts, settings, and so on.

1 Go to Settings > Personal > Accounts & sync.

2 Touch the account to delete.

3 Touch Menu icon > Remove account.

Configure account sync options

You can configure synchronization options for any of your apps. You can also configure what kinds of data you synchronize for each account. Some apps, such as Gmail and Calendar, have separate synchronization settings that provide more finegrained control. In such cases, the settings you select at the account level are still valid.

For some accounts, syncing is two-directional; changes that you make to the information on your device are made to the copy of that information on the web. Your Google Account works this way. Other accounts support only one-way sync: the information on your mobile device is read-only. To view the Accounts & sync settings screen described here:

1 From a Home or All Apps screen, touch the Settings icon.

2 Under Personal, touch Accounts & sync.

Some apps also have their own settings related to syncing. For example, to control message syncing in the Gmail app, touch Menu icon > Label settings > Sync messages.

Configure general sync settings

1 Go to Settings > Personal > Accounts & sync.

Indicates that some or all of an account's information is configured to sync automatically.

Indicates that none of an account's information is configured to sync automatically.

2 Check or uncheck Menu icon > Auto-sync app data to control whether changes you make to information on your device or on the web are automatically synced with each other.

If you turn off Auto-sync, you need to sync manually to collect messages, email, and other recent information, and won't receive notifications when updates occur. For example, when this option is checked, changes that you make in your People app are automatically made to your Google contacts on the web.

If this option is not checked, you may be able to use an application's tools to sync data manually. You can also sync manually to collect messages, email, and other recent information. Leaving Auto-sync off can help extend your battery life, but will prevent you from receiving notifications when updates occur.

Sync information manually

1 Go to Settings > Personal > Accounts & sync.

2 Touch the account whose data you want to sync.

3 Touch Menu icon > Sync now.

Change an account's sync settings

1 Go to Settings > Personal > Accounts & sync.

2 Touch the account whose sync settings you want to change.

The Sync Settings screen opens, displaying a list of the kinds of information the account can sync.

3 Check or uncheck items as needed.

Unchecking an option does not remove the information from your device; it simply stops it from being kept in sync with the version on the web.

Special attention :

The power input is 5V/ 2A; please do not use another spec !
