

ASSEMBLING THE BOX

When folding sides of box up, squeeze **FLAP A** in on both sides before folding up **FLAP B**. Make sure that both sides of **FLAP B** rest tight against **FLAP A** before securing adhesive.

FITTING THE LID

1. Hold lid with both hands, making sure it is level and even.
2. Position the lid directly above the box, keeping all sides aligned. Lower it straight down at the same time, ensuring all edges fit evenly over the top of the box. Avoid tilting or sliding one side in first, this helps the lid fit properly.
3. Repeat a few times, allowing the tightness of the lid to ease up a little bit.
