

MY SAFE BLOCK | THE UNIVERSAL DOOR BLOCKER!

My Safe Block Universal Door Blocker is a portable security device that works on most standard doors with a knob or lever. It is ideal for additional security and privacy in most residential and commercial doors - hotels, apartments, college dorms, vacation accommodations and more. To ensure the proper performance of your product, please read and save these instructions.

(Installed & In Locked Position)

BEFORE FIRST USE

Two adhesive shock absorbing protective pads have been included with your My Safe Block to protect your door and trim from potential scratches. To apply, peel off the protective backing from pads and place adhesive side in the positions on the locking mechanism shown in **Figure D**.

INSTALLATION

1. Fold the movable locking mechanism into the unlocked position, parallel to My Safe Block's main body, and slide back toward the handle, (**Figure A**).
2. My Safe Block has a metal tab bent at a 90-degree angle located at the end furthest from the handle. Open the door you wish to protect and insert the tab completely into the your door jam's strike plate. For doors with the strike plate to the right, point the tab to the right and position it at the bottom of the strike plate, (**Figure B**). For doors with the strike plate to the left, point the tab to the left and position it at the top of the strike plate, (**Figure C**).

3. Once the tab is inserted completely into the strike plate, carefully close your door while holding My Safe Block in place.
4. Slide the locking mechanism as close as possible toward the door with its 'teeth' engaged with My Safe Block's main body.
5. Fold the locking mechanism down so it is perpendicular with My Safe Block's main body, preventing unwanted intruders from opening the door, (**Figure D**).
6. To disengage, fold the locking mechanism back to the unlocked position, slide back toward the handle, and open the door.

IMPORTANT:

1. My Safe Block works with most standard residential and commercial doors with a knob/lever, bolt/latch, face plate and strike plate.
2. My Safe Block is intended for doors without lock or deadbolt but can always be used as "back-up" protection for doors with locks and deadbolts. Always use a door's integrated locking system when possible as its primary lock method.
3. We are not responsible for user related damage incurred during installation.
4. To clean, wipe with a damp cloth.

30 DAYS LIMITED WARRANTY:

FLIPO GROUP warrants to the original purchaser, when used in North America only, that this product shall be free of defects in material and workmanship. This warranty applies within 30 days of the original purchase with normal home use. This warranty does not apply for commercial use of this product.
