

Solar Light Bird Feeder

Use and Care Instructions

How to Use the Solar Light

- To activate the solar function, locate the power switch that is located next to or under the solar panel or lid.
- To turn on the light, gently remove the lid, locate the switch, and move it to the "on" position, then replace the lid securely and lock it into position. The solar light is now ready to use.
- During the day, the solar panel will charge directly from the sun. At night, it will turn on automatically using the battery's stored energy.
- Ensure this solar panel is charged in direct sunlight for at least 6 hours a day. Shady locations and a lack of sunlight will affect this light's performance.
- Do not place near artificial lights at night (such as street lights), as the bright lights may cause the sensor to switch off.

Troubleshooting

- If the light fails to illuminate automatically at night, please check the following things:
 1. The power switch is in the “on” position.
 2. The batteries have been charged for at least 6 hours in direct sunlight during the day.
 3. Ensure the solar panel is clean.

Batteries

- Although the battery has been charged by the manufacturer, the electric levels may have dropped when you receive it.
- Ensure you charge the solar panel in direct sunlight for at least 6 hours before use.
- Battery specification - 1 x 1.2VAA, 300mAh rechargeable battery.
- To protect the environment, batteries must not be thrown out in your domestic refuse collection or disposed of in a fire, as they contain dangerous materials. Please recycle at your local recycling facility. Check with your local authority for recycling advice.

Warnings

- This product is not intended for use in adverse weather conditions such as strong wind and rain, or during the winter months. It is advised that this product be stored away during these times.
- This solar light is not a toy and is not intended for household illumination.
- Do not expose solar light to direct heat, flames, or submerge it in water.
- The LED bulb and battery are not replaceable.
