

USER MANUAL

PLEASE BE SURE TO READ THIS INSTRUCTION THOROUGHLY BEFORE BEGINNING TO USE YOUR SMART WATCH.

I . Smart Watch Introduction

This smart watch is with full touch screen and zinc-alloy housing which integrate heart rate, blood pressure, different sports mode, message board and sleep tracking functions. You can set your personal information, sync time to watch, and data from watch to App once App is connected with watch. Other features of the watch: five stylish clock faces, remote camera shutter, remote music control and etc.

II. Intended Use

This smart watch is a general wellness product intended to promote physical fitness by tracking your work out and aerobic activity. It is **NOT** a medical device, nor is it intended or designed to take the place of one. It is **NOT** designed to diagnose or help treat any specific condition or disease.

III. Charge Your Smart Watch

A fully charged Smart Watch has an extended battery life of up to 30 days (standby time). Battery life

and charge cycles vary based on usage, screen display brightness and etc. We recommend using adaptor with USB port output **5V1A** or the USB port on your computer. A battery icon appears on the screen to indicate your Smart Watch is charging. Charging fully takes about 1-2 full hours.

IV. How to use?

1. Operation

1). ON / OFF:

Power On:

Press and hold the side button for 3 seconds, the watch will vibrate and turn on.

- a. To navigate to various features, just slide screen from left to right, or right to left;
- b. Press the side button to go back to home screen;

- b. turn your wrist to wake up screen;
- c. press the button on the watch;

2. Working Condition for Mobile Phone

- iOS 8.5 or Above
- Android 5.1 or Above
- Support Bluetooth 5.1

3. Installing the App

Your smart watch works with the **Wearfit Pro** App available in the App Store and Google Play. Be sure to search for and download the App before moving on to the instructions. Besides, you can also scan QR code below to download App to your mobile phone.

For both Android & iOS

We strongly suggest user to set his/her personal profile in App for accurate results. The app will ask for permissions once installed. We highly encourage the user to give all permissions to the App when firstly enter into it & pairing access to their smart phones for complete functionality.

4. Bluetooth Connection

Make sure your Bluetooth is enabled on your mobile phone. Click **"Add device"** from the navigation bar **"Me"** in App to enter into smart watch searching page. Once App and smart watch connected, time will be synced as per your mobile phone. And data will be synced from smart watch to App.

Slide the screen downside to upside from the clock face, find the MAC address of your smart watch, make sure the MAC ADDRESS displayed on your smart watch matches the MAC ADDRESS of the watch on your App. These two clock faces below will show you the Bluetooth icon connected.

V. Functions and operation

1.1 Clock Face

This smart watch provides you five stylish clock faces. Long press on the clock face, the clock face will shrink, slide the screen to choose the clock face which you prefer. Then tap on it to confirm.

1.2 Functions Operation on watch

To navigate to basic functions (Sports, Heart Rate, Sleep), just slide screen left to right, or right to left.

Slide screen up to down from the clock face, you can see Bluetooth Icon, Battery Life, Date, Screen Brightness Adjustment, Count down, Version, Message, Power off functions.

Slide screen downside to upside from clock face, you will find other functions other than the basic functions above:

Message, Heart Rate ,Blood Pressure, SPO2, Sleep, Sports Mode,

Setting, Camera, Weather, Find Phone, Stopwatch, Music

Slide screen from left to right to exit these secondary interfaces.

1.3 Heart Rate

When smart watch is in Heart Rate interface, it will take around 10 seconds to get you heart rate reading and 20 seconds to have a final heart rate reading. The watch will automatically monitor and record heart rate every 5 minutes. Note: Please make sure smart watch contact with your skin directly while measuring. Besides, make sure to avoid external light. And the contact area with your skin is without sweat or stain.

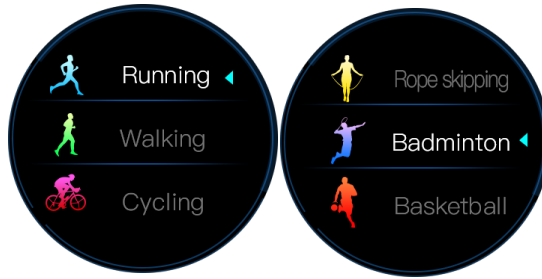

1.4 Blood Pressure and Blood Oxygen

Slide screen to "BP" and "BO" interface, smart watch will automatically measure. It will take around 40 seconds to get you blood pressure reading and 50 seconds to have a Blood Pressure and Blood Oxygen reading. The watch will automatically monitor and record Blood Pressure and Blood Oxygen every hour. Note: Please make sure smart watch contact with your skin directly while measuring. Besides, make sure to avoid external light. And the contact area with your skin is without sweat or stain.

1.5 Sports Mode

Tap "Sports mode" on the screen to go into secondary functions, there are following modes: Running, Walking, Cycling, Rope skipping, Badminton, Basketball, Football, Swimming, Volleyball, Tennis ball, Mountain climbing, Rugby, Golf, Baseball, Pingpong. Choose one of them which match with your current workout. And slide screen from left to right to pause or end the current workout. The last workout data will be displayed on the training page.

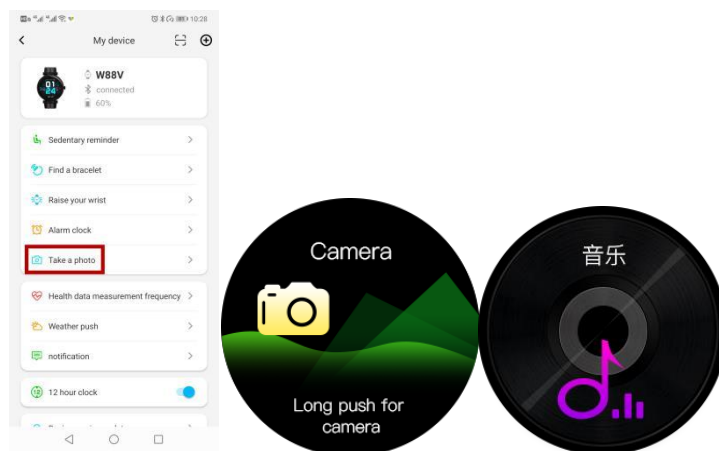

1.6 Message Board, Remote Camera Shutter, Remote Music Player

You can read the last messages from smart watch in the message board. Make sure you already enabled notifications in your App.

Click “Take a photo” in App, and shake your watch 3 times to snap photos.

Navigate screen to “Music” on the screen to play/pause, skip forward, or skip to previous music from your music Apps.

Important Notes:

1. Do not attempt to disassemble your smart watch. Do not attempt to replace the battery yourself, as it may cause damage to your smart watch.
2. Do not expose your smart watch to strong chemicals such as gasoline, clean solvents, acetone, alcohol, insect repellents, as they may damage the unit's seal, case. Do not expose the strap to continuous moist conditions and harsh chemicals. If so, the strap can potentially tarnish and affect the look of strap.
3. Protect the smart watch from extreme heat, shocks and exposure to the direct sunlight long time.
4. Do not use a substandard charging power supply, otherwise it will shorten the battery life, and even may cause damage to the battery.
5. Do not wear your smart watch to take a hot shower/bath.
6. Dry your smart watch and strap thoroughly with a non-abrasive, lint-free cloth.
7. It is important to keep the smart watch's sensor clean to ensure an accurate measurement.
8. Your daily data, like steps, distance, calories, heart rate and etc. come from smart watch. App is a platform to collect data and analyze data.
9. Keep the smart watch out the reach of children. If swallowed by mistake, please contact the doctor

immediately.

Dust and water resistance is not permanent and may diminish as time passes. The following conditions may affect the waterproof performance of the wearable product and should be avoided:

1. The product falls from a height or is subject to other shocks.
2. The product comes into contact with alkaline substances such as soap or soapy water when showering or bathing.
3. The product is exposed to perfumes, solvents, detergents, acids or acids, insecticides, lotions, sunscreens, emollients or hair dyes.
4. The product is exposed to high velocity water, such as during water skiing.
5. Wear the product in a high humidity environment such as a sauna or steam room.
6. Charge the product in a wet state.
7. Not recommended to immerse the device in water. You can wear and use while exercising (touching sweat), raining and washing your hands. Not suitable for showers, swimming, scuba diving, water skiing, other wading activities and deep water activities in the face of high-speed water.
