Step 1
Unscrew and remove the battery compartment lid.

Step 2
Insert three AAA batteries into the battery pack according to the polarity indicators in each battery compartment (see Fig. 2).

Note: If you are having trouble seeing the Polarity Indicators, the flat end of the battery sits on the spring end of the compartment, and the raised end of the battery sits on the solid end of the battery compartment.
Step 3
Reinsert the battery pack, making sure the arrows on the sides of the pack are pointing towards the LEDs (see Fig. 3). Replace the battery compartment lid.

Step 4
Ensure that the moisture seal is not showing. The battery compartment lid will come to a definite stop when it is completely closed.

Step 5
To turn flashlight on and off press the on/off button on the back of the battery compartment lid (see Fig. 5).

Step 6
This flashlight has five modes. Click once to turn on. This is Mode 1: High. Clicking the flashlight off & on again cycles through the additional modes:

Mode 2: Medium
Mode 3: Low
Mode 4: Strobe
Mode 5: SOS
Step 7

This flashlight has variable focus. When completely retracted, the result is a powerful floodlight. When completely extended, the result is an intense, focused beam.

Note: The LED in this flashlight is extremely powerful. NEVER point this flashlight directly into the eyes in any focus setting. Severe damage to the eyes can occur.
